HEAVY EQUIPMENT RENTALS PROVIDES SULLY-MILLER CONTRACTING WITH JOHN DEERE 850D LC EXCAVATOR AND THEIR TOTAL SERVICE SOLUTION

HEAVY EQUIPMENT RENTALS PROVIDES SULLY-MILLER CONTRACTING WITH JOHN DEERE 850D LC EXCAVATOR AND THEIR TOTAL SERVICE SOLUTION

Written by: Brian Hoover

When Sully-Miller Contracting recently began work on a \$5 million, one-mile long storm drain project for the City of Rancho Cucamonga, they knew they would need a very large excavator onsite to handle the installation of the 96" concrete storm drain. Like they have done so many times before, Sully-Miller contacted Heavy Equipment Rentals at their Corona location and requested a unit to handle the job. This was a very big job and in order to accommodate the request as best as possible, HER General Manager, Kent Porter immediately made the additional acquisition of a John Deere 850D LC excavator. The HER fleet has all sizes of excavators, but none quite as large as the 185,876 lb., 532 hp John Deere 850D LC excavator with a digging depth of 31 ft. 5 in. Heavy Equipment Rentals, LLC has made their reputation here in Southern California for offering total service solutions like this, even if it means purchasing the right unit for their customers. Dennis Gansen is the Operations Manager at Sully-Miller Contracting and he comments, "We rely on equipment rental companies to supply us with construction equipment that we don't already have in our fleet. Large excavators are a need that we have quite often and the reason that we turn to Heavy Equipment Rentals is pretty simple. Their rates are very competitive and their service is outstanding. In addition their equipment is always late model and reliable. I have had a relationship with Kent Porter over at HER for many years now and

Sully-Miller Contracting uses a John Deere 850D LC excavator rented from Heavy Equipment Rentals on a \$5 million, one-mile long storm drain project for the City of Rancho Cucamonga.

it did not surprise me when he actually went out and purchased a John Deere 850D LC excavator to best meet our job site needs. HER is a great partner and has always been there for us and we want them to know that we appreciate their efforts."

Heavy Equipment Rentals, LLC has an equipment inventory of more than 300 heavy equipment machines between their Corona and Pacoima locations. HER offers 9 product lines including: excavators, loaders, bull dozers, scraper, rock trucks, water equipment, mobile crushers, rollers

and graders, along with Southern California's most extensive range of attachments. They have been providing customers with exceptional service and high quality earthmoving solutions since their inception back in 1999. HER has grown to be a premier independent heavy equipment rental company in Southern California with a modern fleet of equipment featuring Caterpillar, Hitachi, Komatsu, Volvo, Moxy, Hyundai, Doosan, Ingersoll-Rand, Bomag and Freightliner. They currently serve the needs of a diverse range of construction customers,

such as general grading, pipeline, demolition, paving, water/dust control and excavating. Kent Porter, General Manager for Heavy Equipment Rentals, LLC comments, "Our equipment is updated regularly keeping pace with technology and offering customers the latest equipment that is more economical, more efficient and productive than earlier models. We would be happy to meet with you at your convenience and show you our complete range of equipment and models, as well as our rates and other services."
